Fast and versatile – the basixTOUCH

provides expanded capacity for inflation. With 35 atm pressure capability and 30 mL syringe volume, the basixTOUCH is ideal for any interventional lab using high pressure, large volume balloons. With wider threads and quick-release handle, the basixTOUCH offers rapid inflation and deflation to busy labs that need top efficiency.

With a precise digital pressure gauge

and digital timer, you don’t need to wonder how long an inflation was, or what pressure was obtained. The Blue Diamond digital inflation device offers an integrated digital gauge and timer, with the ability to record and recall prior inflation information. Ideal for ensuring precise inflation pressure and for tracking procedure data.

For 25 years, Merit Medical has been the market leader in inflation device technology. By working closely with clinicians, we are able to create innovative devices to meet the need for faster inflation, greater capacity, accuracy, and reliability. Our broad product portfolio offers a wide range of features and price options—analogue and digital, low and high pressure capacity—for inflation, deflation, and measurement of pressures in a variety of balloons and stents.

The gold standard inflation device for interventional balloon inflation—with over 10 million devices used worldwide, busy interventional labs can rely on the basixCOMPAK for their procedures. The basixCOMPAK offers 30 atm pressure and 20 ml volume and can be packaged with a wide variety of angioplasty kits and procedure packs.

**ANALOG INFLATION DEVICE**

**LARGE VOLUME ANALOG INFLATION DEVICE**

The BIG60 inflation device is designed to rapidly inflate and deflate large volume, low pressure balloons. With 60 ml fluid volume and a 12 atm pressure capability, the BIG60 is ideal for interventional practitioners that routinely use large volume interventional devices.

Patients and medical staff want to reduce blood loss as much as possible.
In response, Merit Medical has developed a full line of hemostasis valves to minimize blood loss in interventional medicine, while supporting a wide array of procedures and devices. Merit Medical has been a market leader in the design and manufacture of hemostasis valves and has manufactured over 10 million valves to support the diverse needs of our users.

Access-9™
Premier large bore 9F device with standard Tuohy seal with fine pitch threads for rapid opening and closure.

AccessPLUS™
Premier large bore 9F device with specially designed Tuohy valve that improves wire grip.

DoublePlay™
Large bore double valve for kissing balloon procedures

Honor®
Small bore 7F device with push-pull bleedback mechanism. The Honor has an innovative triple-slit bleedback seal, and no Tuohy-style seal.

MBA™
Small bore device combines both the reliable Tuohy seal as well as a bleedback seal, providing operators with 2 hemostatic mechanisms.
