

Worley™ **ADVANCED CAKit**
CONTRAST ADMINISTRATION KIT

MERTMEDICAL™

Advancing Coronary Venous Visibility

Enjoy the convenience of having all the items you need delivered together, streamlining clinical set-up time to save both time and money.

Advancing Real-Time Visibility for Accurate Placement

Inserting Cardiac Resynchronization Therapy (CRT) devices requires accurate placement of LV leads quickly and efficiently. Merit Medical's Worley Contrast Administration Kits combine all of the products you need to gain sustained, clear visibility of coronary venous anatomy. The Worley CA Kit provides real-time visibility during CRT implantation for improved LV lead placement.

Product Features

Medallion® Syringes - Manufactured from strong polycarbonate with glass-like smoothness and clarity for improved visibility and control.

Inject10n™ Coronary Control Syringe - Smaller barrel ID reduces hand fatigue and requires less force to generate high pressure during injections.

MAP (Merit Angioplasty Pack) - Maintains hemostasis without compromising catheter movement or restriction of contrast flow.

Stopcock - Designed for ease of use and to give you confidence when stopping and starting flow during procedure.

HP Tubing - Clear PVC tubing configured to meet the specific need of the procedure.

Accessories - Labels and bowl complete the Advanced CA Kit with the accessories you need to meet your safety goals.

Worley Advanced CA Kit CONTRAST ADMINISTRATION KIT

Part Number	Description
K12-WORLEY1	Worley Advanced Contrast Administration Kit 1
