

BrachyBytes®

A Standard of Care Option for Breast Conserving Therapy.

JULY 2019

2-Day APBI with SAVI® Brachy

Fractions of 750cGy were administered 3x over 2 days

CASE REVIEW

Patient:

62-year-old woman, healthy

Diagnosis:

1.8cm right breast Invasive Ductal Carcinoma

Rx:

Lumpectomy and sentinel node biopsy, followed by TRIUMPH-T radiation regimen of 3 fractions over 2 days at 750cGy

Conclusion:

Patient returned at 1 month and was seen every 6 months until the last follow-up at 18 months. She had no complications and at last exam there were no telangiectasis or hyperpigmentation, fibrosis, scarring or palpable seroma.

Exciting Changes for SAVI® Brachy

We are excited to announce that a new package design is coming for SAVI Brachy! As the new packaging debuts this month, the SAVI Brachy technology you know and love will continue reducing the burden of breast cancer on women and their families.

Combining the tissue-sparing dosimetry with single-entry ease, SAVI's strut-based approach is designed to maximize ease of use during placement while providing unparalleled dose customization.
